Fifine K420 Webcam Features

Fifine HD 1440P Webcam Makes You Enjoy Happy Video Chat Time: A webcam with a mic can be used for video calling, conferencing, live streaming, distance teaching, recording, facial recognition, telehealth calls, working at home and learning at home, etc.

High-Definition Video Call: Computer camera with 4 million pixels high-definition image sensor, effective resolution up to 2560 * 1440P (30fps), which makes your video clearer and smoother without delay. An excellent quality video that makes you look like a professional.

Noise Reduction Microphone: Built-in noise-reducing microphone, pc webcam with microphone automatically eliminates noise and captures clearer sound even in a noisy environment.

Low-light Correction: The video webcam keeps the color on balance, automatically adjusts color and brightness for natural lighting, so you always do anything on a web camera even in dim light.

108 Degree Wide-Angle: With fixed focus and 108° wide-angle lens features, the streaming camera captures every detail of the video. Perfect for video conferencing and multi-person chat, which can give you an excellent perspective.

USB 2.0 Plug & Play: Webcam for a computer can be easily used by simply connecting it to a PC USB 2.0 data port. You don't need to install a driver or download software, just plug and play.
